Working With Order Books

The Order Books application (option 10 of the Reports screen) is used to print the following order books:

- Multi-Week Order Book - prints with bar codes for scanning and with an index.
- Two and Three Column Order Book - prints in seven different formats including one with bar codes. All but one format requires the use of a printer with IPDS (intelligent printer data stream) capability.
- Profile Order Form - prints in two formats including one with bar codes and for individual customers.
- 6 Week Tear Strip Book - prints with the prices for one or two customers and with an index.
- Bar Code Order Book (also called Custom Order Book) - prints with EAN8, UPC numbers or Plessey bar codes for a specific customer and with an index.

Printing Multi-Week Order Books

The Multi-Week Order Book application is used to print order books in a format for use for 5 and 10 weeks. The items are printed with bar codes for scanning, and in order by book heading number (also called product heading) and book sequence number. Refer to Working With Items of the Item File Maintenance document for information about the **Book Heading** and **Book Seq** fields of item records.

The value of the **Multi-Week Order Book** field of the SYS014 default system option designates the 10-week or 5-week format used for printing multi-week order books. Refer to the DAC Default System Options document for additional information.

```

1. Select option 1 (Multi-Week Order Book) from the Order Books screen. The Order Book Selection Prompt screen appears with the predesignated format displayed for the **Order Book Version** field below the *Print Information* heading.

```
BSDDPVR  ENTER  Creative Data Research-SUPPORT      8/24/99 10:02:45
                        Order Book Selection Pmt.

                        Selection          Criteria:

Beginning Product Heading
Ending Product Heading . 9999

Warehouse code . . . . . 1

Print Wholesale Price? . Y
Output To File? . . . . .

Message . . . . .

Print Information:

Order Book Version  1          Version 1 Has 10 Weeks. No UPC.
                        Version 2 Has 5 Weeks And The UPC.

F3=Exit  F4=Search  F6=Print
```

2. Enter a heading code for the **Beginning Product Heading** and **Ending Product Heading** (4,a) fields, or press <F4> to select a heading code from the Select Product heading screen. Note: Heading codes are numbers which are entered as alphanumeric characters; therefore, users should enter preceding zeros. For example, *0010* should be entered to designate the number 10.
3. Enter a warehouse code for the **Warehouse Code** (6,a) field.

4. Enter *Y* (yes) for the **Print Wholesale Price?** (1,a) field to print the item's default wholesale price for its standard selling unit of measure.
5. Enter *Y* (yes) for the **Output To File?** (1,a) field to print the order book as a file.
6. Enter text for the **Message** (35,a) field to print at the top of every page.

```

BSDDPVR  ENTER  Creative Data Research-SUPPORT      8/24/99 10:02:45
                        Order Book Selection Pmt.

                        Selection      Criteria:

Beginning Product Heading 0390

Printing Two And Three Column Order Books

The Two/Three Column Order Book application is used to print order books in seven different formats based on the version designated by the user. The items can be printed in order by book heading number and book sequence number, or in order by sales class numbers for all but one format. Refer to Working With Items of the Item File Maintenance document for information about the **Book Heading** and **Book Seq** fields of item records.

Refer to the DAC Default System Options document for information about the **Two Column Order Book**, **3 Column Order Book Page** and **Separator Char. For 3 Column Book** fields of the SYS014 default system option.

When printing an order book, the following versions designates which format is used:

- *1* - contains two columns of items, includes a second column for ordering eaches, and prints on an IPDS (intelligent printer data stream) printer in a portrait orientation.
- *2* - contains two columns of items, includes a second column for ordering eaches, and prints on a non-IPDS printer in a portrait orientation. Users have the option of limiting the items included to those printed in the Customer Price/Retail List (customer price book) for a designated customer. Refer to Working With Customer/Item Records of the Billing File Maintenance document for information about the **Authorized Flag** field.
- *3* - contains two columns of items, and prints on an IPDS printer in a portrait orientation with wider left margin for hole punching.
- *4* - contains two columns of items with bar codes, and prints on an IPDS printer in a portrait orientation.
- *5* - contains three columns of items, and prints on an IPDS printer in a landscape or portrait orientation. Users may print the order book for multiple customers, and have the option of limiting the items included to those purchased by the customer.
- *6* - contains two columns of items, and prints on an IPDS printer in a portrait orientation with wider left and right margins.
- *7* - contains two columns of items with prices, and prints on an IPDS printer in a portrait orientation. Users have the option of printing the list price or the price for a designated customer.

An **N** can be printed for items that are not guaranteed to be returnable if version 1 or 2 are printed. Refer to Working With Items of the Item File Maintenance document for additional information about the **Guarantee Return** field of item records.

Printing Two Column Order Books

Refer to Printing Two And Three Column Order Books above for descriptions of the two column order books (versions 1 through 4, 6 and 7). Examples of all versions of the order books are illustrated below.

Refer to Adding Space To Two And Three Column Order Books below for information about adding additional blank space for designated items in the order book.

Note: Unlike three column order books, two column order books cannot be printed for groups of customers.

F3=Exit F4=Search F6=Print F8=Item Spacing F9=Customer List F10=Submit Lists
```

2. Enter data for one of the following:
 - **Beginning Sales Class** and **Ending Sales Class** (5,n) field - a sales class number can be entered to print the two column order book in any version except version 7. Users can press <F4> to select a sales class number from the Select Sales Class Master screen.

- **Beginning Book Heading** and **Ending Book Heading** (4,a) field - a book heading code can be entered to print the two column order book in any version. Users can press <F4> to select a heading code from the Select Book Heading screen. Note: Book heading codes are numbers which are entered as alphanumeric characters; therefore, users should enter preceding zeros. For example, *0010* should be entered to designate the number 10.
3. If version 6 or 7 will be printed, *N* (no) must be entered for the **Print Check Digit** (1,a) field. If version 1 through 4 will be printed, *Y* (yes) can be entered to include check digits with item numbers when printing the two column order book.
 4. Enter 1 through 4, 6 or 7 for the **Order Book Version** (1,n) field to designate the format used for printing the two column order book.
 5. If version 1, 2 and 3 will be printed, *Y* (yes) can be entered for the **Print 'XXX' For Non-Sellable** (1,a) field to prohibit users from entering order quantities for eaches by printing Xs in the two column order books containing an eaches column. The Xs only appear for items that are not sold at the eaches level.
 6. Press <Enter>.
 7. If version 2 will be printed (as illustrated below), enter data for the following fields to limit the items included in the order book to those printed in the Customer Price/Retail List (customer price book) for the designated customer:
 - Optional: **Customer Number** (6,n) field - a customer number.
 - Optional: **Select Book Print Items Only?** (1,a) field - enter *Y* (yes).

Printing Three Column Order Books

Three column order books (version 5) can be printed for individual customers, the customers of a single sales representative, the customers of a call route, or a group of customers. Users have the option of limiting the items included in the order book to the new items added since a designated date, or to the items purchased by the customer.

Refer to [Printing Three Column Order Books For Multiple Customers](#) below for information about printing version 5 for a group of customers.

Refer to [Adding Space To Two And Three Column Order Books](#) below for information about adding additional blank space for designated items in the order book.

Refer to [Printing Two And Three Column Order Books](#) above for descriptions of the three column order book (version 5). Examples of all versions of the order books are illustrated below.

Items To Skip Before This Item (3,n)** field (as illustrated below), and press <Enter>. Note: Each item printed in the order book containing bar codes equals the space of three lines.

```

GSCSE1R  ADD      Creative Data Research, Inc.          6/27/08 14:51:03
                        Edit Item Spacing Data Details

Application Id . . . . : 008      Two Column Order Book
Item Number . . . . . : 100500  CAMEL FILTER 85 BOX

1. Lines To Skip Before This Item
2. Items To Skip Before This Item  3

NOTE: Number 1 Refers To Non-Barcoded Book. Number 2 Refers To Barcoded
Books. These Are Two Separate Fields Because On Barcoded Books, An
Item Will Take Up More Than One Line. For Example, On The Two Column
Order Book, Each Item Takes Up 3 Lines. Figure The Number Of Lines
You Wish To Skip, Then Divide By 3. If You Want To Skip 9 Lines,
You Would Put 3 For The #2 Spacing Option.

F3=Exit

CONFIRM: Y (Y/N)

```

7. If 5 was entered for the **Order Book Version** field, enter the number of blank lines to be inserted for the **1. Lines To Skip Before This Item (3,n)** field (as illustrated below), and press <Enter>.

```
HIDKE1R  ADD      Creative Data Research, Inc.      6/27/08 14:52:44
                        Edit Item Spacing Data(3 Column Book)

Application Id . . . . : 026
Item Number . . . . . : 100500 CAMEL FILTER 85 BOX

1. Lines To Skip Before This Item 10

F3=Exit

CONFIRM: Y (Y/N)
```

8. Press <Enter> when prompted to confirm.
9. Continue adding item spacing records as described above, or press <F3> to exit. The Two/Three Column Order Book Selection screen appears.

Printing Profile Order Forms

The Profile Order Form application is used to print order forms for individual customers for a one-time use. The items are printed in order by book heading number (also called product heading) and book sequence number. Refer to Working With Items of the Item File Maintenance document for information about the **Book Heading** and **Book Seq** fields of item records.

The order forms list only items which the customer has purchased, and contains the customer's final billing price for the standard selling unit of measure, the average quantity ordered by the customer year-to-date, and the last date of purchase. Users designate one or all of the following types of item for printing in the order forms:

- All items that the customer has purchased.
- Items that are designated in the customer/item record for printing in the customer's price book.
- Items that are designated in the customer/item record as authorized for purchase.

Refer to Working With Customer/Item Records of the Billing File Maintenance document for information about the **Authorized Flag** field of customer/item records.

Profile order forms can be printed with or without bar codes. If bar codes are printed, an **N** can be printed for items that are not guaranteed to be returnable. Refer to Working With Items of the Item File Maintenance document for additional information about the **Guarantee Return** field of item records.

Printing 6 Week Tear Strip Books

The 6 Week Tear Strip Book application is used to print order books on perforated paper that can be used for six weeks. The items are printed in order by book heading number (also called product heading) and book sequence number. Refer to Working With Items of the Item File Maintenance document for information about the **Book Heading** and **Book Seq** fields of item records.

Users can designate that one of the following types of items are included in an order book:

- All items including those never previously purchased by the customer.
- Only items that are designated in the customer/item record as authorized for purchase including those never previously purchased.
- Only items that are designated in the customer/item record for printing in the customer's price book including those never previously purchased.
- Only items previously purchased by the customer.

An item's final billing price, as designated for one or two customers can be printed for each item rather than its list price.

Refer to Working With Customer/Item Records of the Billing File Maintenance document for information about the **Authorized Flag** field of customer/item records.

```

2. To print a particular customer's final billing prices for the items, enter the desired customer number for the **Customer Number** (6,n) field, or press <F4> to select a number from the Select Customer Master screen.
3. To print another customer's final billing prices for the items, enter the desired customer number for the **Alternate Customer** (6,n) field, or press <F4> to select a number from the Select Customer Master screen.
4. Enter data for one of the following:
 - **Beginning Class** and **Ending Class** (5,n) field - a sales class number. Users can press <F4> to select a sales class number from the Select Sales Class Master screen.
 - **Beg Product Heading** and **End Product Heading** (4,a) field - a heading code. Users can press <F4> to select a heading code from the Select Product Heading screen. Note: Heading codes are numbers which are entered as alphanumeric characters; therefore, users should enter preceding zeros. For example, *0010* should be entered to designate the number 10.
5. To apply selling allowances when using a particular customer's final billing prices, enter *Y* (yes) for the **Use Allowances?** (1,a) field.
6. If a customer number was previously entered, enter one of the following values for the **Item Selection** (1,a) field to designate which items are included in the order book, or leave the field blank to include all items:
 - *A* - the item is authorized for purchase.
 - *B* - the item can be printed in the customer's price book.
 - *P* - the item was previously purchased by the customer.
 Refer to Working With Customer/Item Records of the Billing File Maintenance document for information about the **Authorized Flag** field of customer/item records.
7. If a customer number was entered for the **Customer Number** field, enter text for the **Price 1 Heading** (7,a) field. It is used as the order book's column heading for the customer's final billing prices.

8. If a customer number was entered for the **Alternate Customer** field, enter text for the **Price 2 Heading** (7,a) field. It is used as the order book's column heading for the alternate customer's final billing prices.
9. If necessary, enter another job queue for the **Job Queue** (10,a) field.
10. Enter one of the following values for the **Sort Option For PBI** (1,a) field to designate the sorting criteria for printing the order book index:
 - *D* - item description
 - *N* - item number.
11. Enter *1* for the **Version** (1,n) field.

Printing Bar Code Order Books

The Bar Code Order Book application is used to print a bar code order book (also called custom order book) for a specific customer. The items are printed with one of the following bar codes for scanning:

- EAN8 - European article number (8 digits)
- UPC - universal product code
- Plessey bar codes
- 3of9 bar codes.

Users have the option of printing a bar code of the customer's number at the top of every page. Refer to the DAC Default System Options document for information about the **Barcode Cust # On Custom Book?** field of SYS014 option.

Users designate that one of the following types of items are included in an order book:

- All items including those never previously purchased by the customer.
- Only items that are designated in the customer/item record as authorized for purchase including those never previously purchased.
- Only items that are designated in the customer/item record for printing in the customer's price book including those never previously purchased.
- Only items previously purchased by the customer.

Refer to Working With Customer/Item Records of the Billing File Maintenance document for information about the **Authorized Flag** field of customer/item records.

Users have the option of including "book-excluded" items in the order book. Refer to Adding Item Records of the Item File Maintenance document for information about the **Book Exclusion** field of item records.

Users have the option of printing the items in order by the customer's, rather than the distributor's, category or class. Refer to Using Work With Customer/Item Flags of the Billing File Maintenance document for information about the **Customer's Category field**. Refer to Working With Customer Invoice Options of the Billing File Maintenance document for information about the **Use Custom Class Sort?** field of the customer invoice options records.

A **Y** is printed next to the item number of the products which are sold by the distributor in broken quantities - at both the first selling unit of measure (usually eaches), and at a second level. The **Y** flag is illustrated in the bar code order book example below (see item number 561158).

An **N** can be printed under the *Guar.* heading for items that are not guaranteed to be returnable. Refer to Working With Items of the Item File Maintenance document for additional information about the **Guarantee Return** field of item records. The **N** flag is illustrated in the bar code order book example below (see Heinz items).

1. Select option 10 (Order Books) from the Reports screen. The Order Books screen appears.

```

3. Enter the desired customer's number for the **Customer Number** (6,n) field, or press <F4> to select the number from the Select Customer Master screen.
4. To print the items in order by the customer's, rather than the distributor's, category or class, enter Y (yes) for the **Sort By Custom Cat?** (1,a) field.
5. To include a blank line between items of a Plessey bar code order book (see **Barcode Option** field below), enter Y (yes) for the **Blank Line Between Items?** (1,a) field.
6. To apply a billing-related vendor receivable deal to the order book's prices, press <F8> and enter the deal's number for the **Deal Number** (6,n) field. If a deal number is used, the order book is sorted by the vendor's federal tax identification number.

7. Enter data for one of the following:
 - **Beg Book Head.** and **End Book Head.** (4,a) field - book heading codes can be entered, or users can press <F4> to select codes from the Select Book Heading screen. Note: Book heading codes are numbers which are entered as alphanumeric characters; therefore, users must enter preceding zeros when necessary. For example, *0001* must be entered to designate the number 1.
 - **Vendor** (6,a) field - a vendor code can be entered, or users can press <F4> to select a code from the Select Vendor Master screen.
8. To apply selling allowances to the order book's prices, enter *Y* (yes) for the **Use Allowances?** (1,a) field.
9. To include "book-excluded" items in the order book, enter *Y* (yes) for the **Print Book Exclude Items?** (1,a) field.
10. Enter one of the following values for the **Item Selection** (1,a) field to designate which items are included in the order book, or leave the field blank to include all items:
 - *A* - the item is authorized for purchase including those never previously purchased.
 - *B* - the item can be printed in the customer's price book including those never previously purchased.
 - *P* - the item was previously purchased by the customer.
11. If necessary, enter *N* (no) for the **Print Price ?** (1,a) field to designate that the customer's final billing prices are not printed in the order book. Enter *Y* (yes), or leave the field blank to print the prices.
12. Enter *N* (no) or *Y* (yes) for the **Print Retail ?** (1,a) field to designate if the customer's retail prices are printed in the order book.
13. If necessary, enter another job queue for the **Job Queue** (10,a) field.
14. Enter one of the following values for the **Sort Option For Price Book Index** (1,a) field to designate the sorting criteria for printing the order book index:
 - *D* - category description
 - *N* - product number.
15. Enter one of the following values for the **Barcode Option** (1,a) field to designate the type of bar code printed in the order book:
 - *E* - EAN8 bar code
 - *U* - UPC (universal product code)
 - *P* - Plessey bar code
 - *3* - 3of9 bar code.

16. To print the average weekly quantities shipped to the customer, enter the number of weeks to calculate the average for the **Weeks For Avg. Qty** (2,n) field. The *Avg. Mvmt.* heading and average weekly quantities are only printed (see example below) when the EAN8 bar code type order book is printed using the distributor's categories or classes (see **Sort By Custom Cat?** above).
17. If necessary, press <F9> (Edit Print Text) to edit the four bar code order book records used for column headings and data boxes in the order books; otherwise, press <Enter> and skip to the next step. If <F9> is pressed, the Edit Bar Book Records screen appears.

F3=Exit

```

Four lines of predefined text (OBK1 through OBK4), similar to those illustrated above, appear when the user first displays the Edit Bar Book Records screen. The first two lines of text (OBK1 and OBK2) are printed once at the top of each page of the order book. The text entered for second two lines (OBK3 and OBK4) are printed repeatedly below the first two lines on each page of the order book (see example below).

To edit an existing line of text, move the cursor to the line on the screen, type over the existing text to change it, and use only the spacebar key to delete text. Note: Users can save text changes at any time without exiting the Edit Bar Book Records screen by pressing <Enter>. If <F3> (Exit) is pressed without first pressing <Enter>, no changes will be saved.
